EDUCATION

Bachelor's Degree in Communications (Advertising)

Pontificia Universidade Católica do Rio Grande do Sul (PUCRS), Brazil

EXPERIENCE

June 2025 - Present

Freelance Front-end Engineer, UI/UX Designer

Self-employed

- Used HTML, CSS, React, TypeScript, JavaScript and Node.js to build client web apps and personal projects from scratch, helping small businesses and independent professionals showcase their services and reach potential customers.
- Used Figma and AI-assisted UI/UX design workflows to create interactive app prototypes, helping clients review and approve the look and user experience before development began.
- Used Vue.js, Next.js, Nuxt, GitHub and CI/CD to translate client functional requirements into technical specifications and deliver multiple projects while meeting deadlines.

August 2025 - August 2026

Senior Front-end Engineer

Allstacks

- Used Vue.js, React, JavaScript, HTML, CSS and Python to build features and fix bugs end to end, so engineering leaders using Allstacks could plan and track their teams' software work.
- Used Node.js, Docker, GitHub, CI/CD and AI tools to migrate the app from Vue 2 to Vue 3, keeping it on a supported, secure framework version after Vue 2 reached end of life.
- Partnered with product and backend teams to translate functional requirements into technical specifications and deliver features while meeting deadlines.

July 2024 - June 2025

Team Leader (people management, alongside DealerOn role)

Software Mind

- Managed six consultants across client accounts, holding regular one-on-ones to identify concerns early and support consultant and client satisfaction.
- Addressed team members' work and personal concerns as their main contact, tracking internal requests to resolve issues before they affected client work.
- Shared regular updates on each consultant's progress and concerns, giving Software Mind visibility into employee and client satisfaction across accounts.

July 2022 - June 2025

Senior Front-end Engineer

Software Mind - Consultant at DealerOn

- Used React, Vue.js, JavaScript, HTML and CSS to rebuild the tools car dealerships use to manage their websites, so dealership staff could update their sites easily.
- Used TypeScript, Figma, UI/UX and Storybook to lead the creation of a shared library of UI components, so every team built dealership pages that looked and worked the same.
- Used GitHub, CI/CD, Vitest, Jest and Testing Library to introduce automated tests that ran on every change, so fewer bugs reached dealership websites.

July 2021 - June 2022

Senior Front-end Engineer

Software Mind - Consultant at Oliver Wyman

- Used Vue.js, JavaScript, HTML and CSS to build MultiRail Web, so freight planners could test “what-if” scenarios and plan rail capacity.
- Used UI/UX design and Figma to simplify complex planning screens, so planners found the data they needed faster.

October 2019 - July 2021

Senior Software Engineer - Front-end Specialist

ADP

- Used Vue.js, JavaScript, HTML and CSS to build an Incident Tracker, monitoring dashboards and a shared component library, so teams could spot and fix system problems faster.

July 2017 - October 2019

Senior Software Engineer - Front-end Specialist

Dell Technologies

- Used AngularJS, JavaScript, HTML, CSS and UI/UX design to build the Dell Financial Services Customer Portal, so consumers and businesses could manage their financing online.
